## <u>Data Sheet E – Results of Internal Review Committee</u>

| Date of Review/Recommend     | lation: November 9, 2007  |
|------------------------------|---|
| Water Body Under Evaluation  | on:   |
| Water Body ID #:             | 0187  |
| Name:                        | Coon Creek (Class C)  |
| Length of Segment:           | 13.0 miles  |
| County(ies):                 | Montgomery  |
| Use Attainability Analysis ( | UAA) Study:   |
| UAA ID#:                     | 0033  |
| Submitter:                   | Pickett Ray and Silver  |
| Date(s) Conducted:           | May 8, 2007   |
| Date Received:               | June 5, 2007  |
| Use Evaluated:               | Whole Body Contact Recreation (WBCR)                                |
| UAA Criteria Evaluated:      | 1-Natural Pollutant Sources.  |
| OTHI CITTETIA EVALUATEA.     | 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.           |
|                              | 3-Non-Remedial, Human Caused Condition.                             |
|                              | 4-Hydrologic Modifications.   |
|                              | 5-Natural Physical Features.  |
|                              | 6-Substantial, Widespread Social and Economic Impact.               |
| Use Determination & Recor    | nmendation:   |
| •                            | ince November 28, 1975?  Yes No Unknown                             |
|                              | JAA survey was conducted in May 2007 and no WBCR was observed.      |
|                              | terviews were conducted during the survey. However, one interview   |
|                              | isual observations in 2006 revealed Secondary Contact Recreation    |
|                              | ng/trapping and fishing, respectively).                             |
| Is the evaluated use a       | attainable?   |
|                              | tream was surveyed at only 2 sites along the 13 mile classified     |
|                              | ent. Although the stream met the maximum depth criterion at both of |
| <u> </u>                     | sites surveyed, weather conditions were "unknown" and baseflow      |
|                              | tions could not be verified. Due to not meeting the minimum number  |
|                              | istribution of sites, the WBCR recommendation is inconclusive.      |
|                              | ver, due to evidence of existing secondary contact use, Secondary   |
|                              | ct Recreation is recommended to be assigned.                        |
| Committee Recommendati       | ion: Add Use Retain Use Remove Use                                  |
|                              | ☐ Modify Use ☐ Inconclusive   |
